WHITE ROMAN HYACINTHS

Weeber & Don's Extra Selected BULBS FOR EARLY FORCING

French Roman Hyacinths

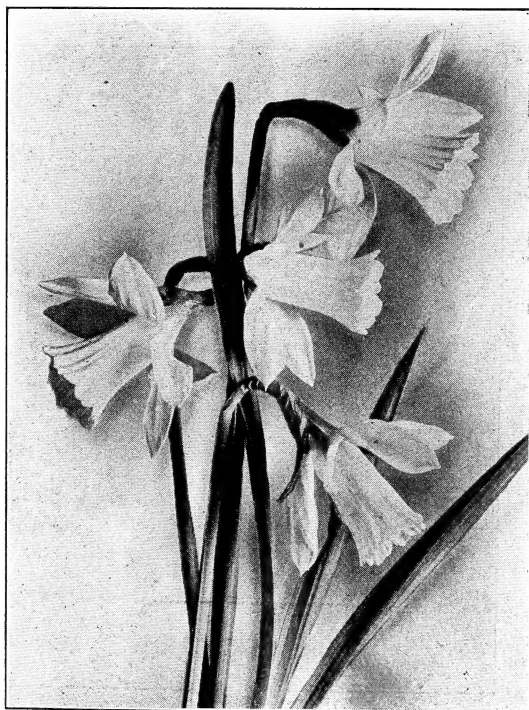

(Ready for Delivery in August)

Roman Hyacinths are extensively used for forcing for cut flowers in greenhouses, conservatories and the window garden. The flowers, while smaller than those of the Dutch Hyacinths, are produced in greater abundance on graceful spikes and are delightfully fragrant. The culture of the Roman is the same in every respect as that of the Dutch Hyacinth, except that they can be started earlier and if planted in August and September will bloom in November and December. A succession can be had in bloom throughout the Winter. They are not considered hardy enough for open ground planting in this vicinity, but they will survive if slightly protected.

Narcissus Trumpet Major FRENCH

Grown in the south of France, these bulbs ripen much earlier than those grown in Holland, and are therefore of great value for early forcing. They can be had in bloom fully a month ahead of the Dutch-grown stock. The flowers are large, trumpet and perianth deep golden yellow. Doz. 35c., 100 \$2.25, 1000 \$20.00.

NARCISSUS TRUMPET MAJOR (FRENCH)

BULBS FOR EARLY FORCING—Continued

Narcissus Paper White Grandiflora

Extremely valuable for forcing and pot culture. They produce large trusses of pure white, delicately scented flowers on long stems, making excellent material for cutting. Plant in pots or boxes, same as Hyacinths. They force very quickly and may be had in bloom as early as Thanksgiving.

Mammoth Bulbs. Doz. 30c., 100 \$2.00, 1000 \$18.00.

Narcissus Paper White Grandiflora Multiflora

An improved variety of the above, producing flowers in greater abundance on fine long stems. A very vigorous grower. Doz. 40c., 100 \$2.50, 1000 \$20.00.

Allium Neapolitanum

A splendid variety for Winter flowering; pure white flowers, with green stamens, borne in large umbels; very easily forced, and good for cut flowers. Doz. 25c., 100 \$1.25.

NARCISSUS PAPER WHITE GRANDIFLORA
MULTIFLORA

Freesia

Very popular and greatly prized for the delightful fragrance of their delicately colored flowers, which are splendid for cutting. They last a long time in water.

Purity. Magnificent pure white flowers of large size, borne on long stiff stems, one truss bearing from 8 to 10 blooms.

Calla, or Lily of the Nile

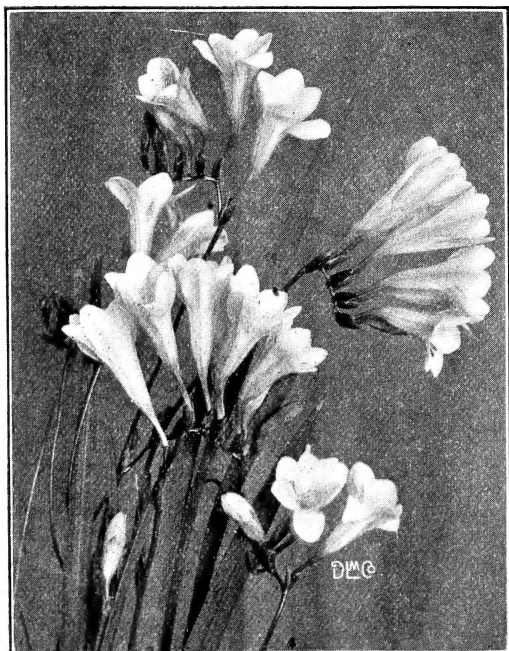

Easily cultivated in pots, requiring only rich soil and plenty of water.

We offer dry bulbs for forcing and Winter flowering purposes. Dry bulbs planted in 4-inch pots will give better results than plants in 6-inch pots that have been kept growing.

WHITE CALLA, or LILY OF THE NILE (Richardia Aethiopica).

Dry bulbs, extra large. Each 25c., doz. \$2.50, 100 \$20.00.

General List of Bulbs and Roots

Hyacinths

CULTURAL DIRECTIONS

Planting in the Open Ground. October and November is the proper time, but they can be set out any time as long as the ground is open and the bulbs remain sound. The best compost for their culture is the following: One-third river or sea sand, one-third well-rotted cow manure, and one-third good garden mould. The beds composed of the above compost should be well dug to a depth of fourteen inches, and raised from two to four inches above the level of the walks. The bulbs should be planted evenly about six inches deep (to the bottom of the bulbs), and from five to six inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs, setting each bulb in a handful of clean sand, which insures drainage.

Directions for Culture in Pots. Select solid, heavy bulbs and plant as early as possible, using a six or seven-inch pot for a single bulb. Fill the pots with a light, rich potting soil, and have the tops of the bulbs just above the surface; give a good watering and set away in a cool place, covering them with about five inches of sand or coal ashes. In about eight weeks they may be taken to the room in which they are to flower. By bringing in a few pots at a time about two weeks apart a succession of bloom may be had.

Glass Culture. Single Hyacinths do better than double in glasses, as they produce a much larger and more showy truss. Place the bulbs in the glasses, which should be filled with water so it touches the bottom of the bulbs; put them in a closed box in a cool place, or on a shelf in the dark part of the cellar, for from six to eight weeks, changing the water every ten days or two weeks; then remove them to the light. If then placed in a cool room they will produce very fine spikes and remain in bloom a long time. A small piece of charcoal in the water is beneficial.

W. & D.'s Extra Selected Hyacinths

For Bedding and Forcing

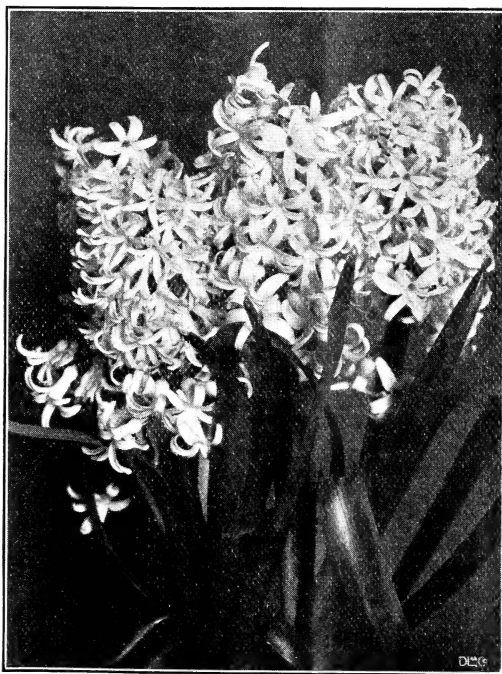

These are grown for our trade and must not be confounded with the so-called Mixed Hyacinths sold by some, containing the cullings of the trade, immature, undersized bulbs. For massing in borders or design work, or for forcing, they are well adapted. Our mixture is composed of bulbs which are nearly of the same height and flower simultaneously.

BEDDING HYACINTH

W. & D.'S SURE CROP MUSHROOM SPAWN. See back of cover.

W. & D.'s Selected Single Named Hyacinths

Choice Extra Size Bulbs for Pots and Glasses

The varieties quoted below are all extra selected, first size bulbs and cannot be excelled. They should always be selected for exhibition purposes, to grow singly in pots or glasses, and are equally superior for bedding, if the price can be afforded.

We specially recommend single Hyacinths; they are preferable to double ones, as they produce larger spikes and force more easily.

The varieties prefixed by an asterisk (*) we recommend as the most valuable.

Single Early Tulips

Tulips are ready for delivery in September

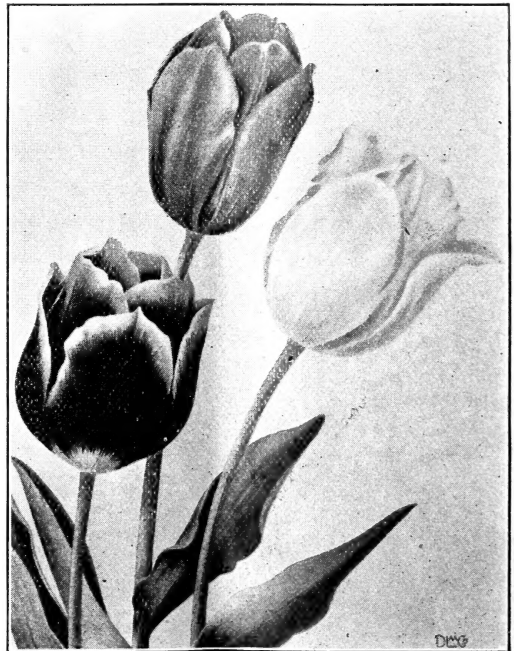

Tulips are perhaps the most popular of all Spring-flowering bulbs and are extensively used for forcing and bedding. For growing under glass the cultural directions given for Hyacinths should be followed. For bedding they should be planted 5 to 6 inches apart and 5 inches deep to the bottom of the bulb. The best time for planting is in October and until the ground freezes late in November.

In order to assist our customers in selecting varieties for beds where it will be necessary to plant only sorts that grow about the same height and bloom together we have affixed numbers and letters explained as follows:

1—Extra early. 2—Early. 3—Late.

1 and 2 may be planted together in the open ground, as 2 will flower before 1 is out of bloom. 3 flowers late. The height is indicated by D for dwarf, M for medium and T. for Tall.

Double Early Tulips

Double Tulips are very handsome, especially when planted in separate colors, such as scarlet, white and yellow. A most brilliant display can be had by placing them in square, diamond, or round-shaped beds, and we shall be pleased to name the varieties most suitable for this purpose if so desired. Double Tulips remain longer in bloom than the single varieties, therefore should not be planted together.

W. & D.'s Single Darwin Tulips

The Most Exquisite Race of the Late Flowering Tulips

The Darwin Tulip is without a doubt the best of the late flowering class. For beds and borders we confidently recommend the following varieties for their stately bearing and rich colors. They have been specially selected as being distinct, showy and beautiful. These Tulips grow from 24 to 36 inches high, the flowers are borne on strong stiff stems and are resplendent in some of the finest shades known among flowers. The cut flowers form an elegant decoration for vases and last a long time in water. The foliage is extremely robust and accompanies the stem to a height of fully 12 inches, thus lending more charm to the flower when cut. By gentle forcing in pots these grand Tulips may be had in bloom by March and will be found of great value for indoor decoration on account of their lovely soft colors, and tall, stately bearing. Too much cannot be said in favor of this handsome class, and they should find a place in every garden.

Late May-Flowering Hardy Cottage Garden Tulips

These beautiful Tulips have mostly been found growing in old cottage gardens in England, Scotland and Ireland, where they have been in some cases for over fifty years. They present a great variety in form and coloring and have none of the stiffness of other Tulips. On account of their extreme hardiness they are specially adapted for permanent hardy flower borders where they should be freely planted in large clumps and masses. They grow from 2 to 3 feet high.

Among the May-flowering Tulips there are real Gems for cutting and bedding, planting in small groups in the shrubbery and herbaceous border, etc.

Order some of the following for a trial, and you will always buy them: "**Caledonia**," "**Gesneriana aurantiaca**," "**Inglescombe Pink**" and "**Inglescombe Scarlet**," "**Isabella**," "**La Merveille**," "**Le Reve**," "**Picotee**" and "**Striped Beauty**."

FOR W. & D'S SELECTED LILY OF THE VALLEY PIPS—See page 16

Single Narcissus, or Daffodils

Of easy culture and equally satisfactory for potting and the open bed and borders, where their rush-like glaucous foliage and white and yellow flowers are very much admired. The soil should be well loosened so that the roots have perfect freedom. May be planted from September to January, in pot or open border, treated in same manner as Hyacinths. Many varieties are sweet scented; valuable for cut flowers in early Spring.

Albicans. Primrose trumpet, white petals. Doz. 50c., 100 \$3.00.

Ard Righ (Irish King). Magnificent golden-yellow trumpet, very large. One of the earliest and best for forcing. Each 5c., doz. 50c., 100 \$3.50.

NARCISSUS NATURALIZED

Mixed Narcissus, or Daffodils

For Naturalizing

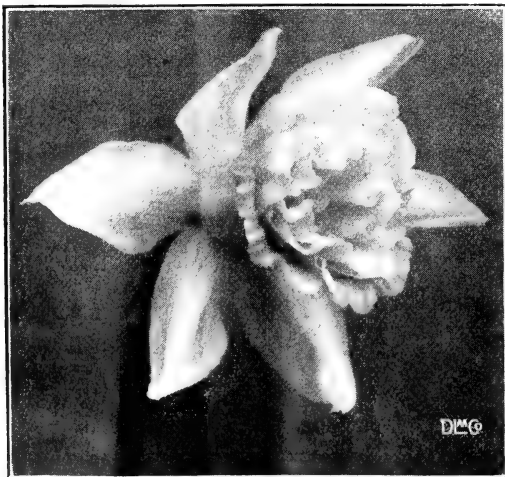

We offer these at exceptionally low prices to encourage liberal plantings. They are very suitable for growing in masses for garden decoration, and are grand for cutting, and are particularly adapted for mixed borders, "naturalizing" in shrubbery by woodland walks, in woods by streams and lakes and semi-wild, outlying grounds. They are perfectly hardy and will flourish and increase.

Large Trumpet Varieties, Finest Mixed. Doz. 25c., 100 \$1.75, 1000 \$15.00.

Medium Trumpet Varieties, Finest Mixed. Doz. 20c., 100 \$1.25, 1000 \$10.00.

Double Varieties, Finest Mixed. Doz. 25c., 100 \$1.50, 1000 \$12.00.

Single and Double, All Kinds Splendid Mixed. Doz. 25c., 100 \$1.50, 1000 \$12.00.

DOUBLE NARCISSUS VAN SION

Double Narcissus, or Daffodils

Double Narcissus, or Daffodils, as they are generally called, are one of the favorites of Spring-flowering bulbs. They are perfectly hardy, of easy culture, and can be forced very readily. Their beautiful and graceful appearance and habit are very much admired.

Alba Plena Odorata (The Double White Poet's Narcissus). Exquisitely scented, fine for forcing. Doz. 25c., 100 \$1.25, 1000 \$12.00.

Incomparabilis, fl. pl. (Butter and Eggs). Yellow, very double. Doz. 25c., 100 \$1.50.

Orange Phoenix (Eggs and Bacon). Large double white, rich orange-scarlet segments; splendid for pot culture and cutting. Doz. 30c., 100 \$2.00.

Sulphur, or Silver Phoenix (Codlings and Cream). Large creamy white flowers with pale sulphur center, excellent for forcing. Each 10c., doz. 50c., 100 \$3.00.

VAN SION, YELLOW (Double Nose).

Large golden yellow; undoubtedly the most popular variety grown. The bulbs are double nosed, and will produce two or three flowers; it is one of the earliest for forcing. Doz. 50c., 100 \$3.00, 1000 \$28.00.

VAN SION (Telamonius Plenus). Extra size bulbs. The double yellow Daffodil; one of the best for forcing. Doz. 35c., 100 \$2.50, 1000 \$20.00.

Our Double Van Sion Narcissus are the true golden yellow and are grown especially for us in the best soil which can be found in Holland. We can recommend them as the best ever sold.

POLYANTHUS NARCISSUS

Polyanthus Narcissus

The Polyanthus Narcissus or Nosegay Daffodils produce large heads of sweet-scented flowers and are specially adapted for Winter and Spring decoration. Where flowers are in demand from November to January the Paper White and double Roman Narcissus are of great value for forcing with the Roman Hyacinths.

Early Double Roman. White, with orange-colored cup; very fragrant. Doz. 35c., 100 \$2.00.

Bazelman Minor. White, with yellow cup; very early. Each 10c., doz. 75c., 100 \$4.00.

Grand Monarque. White, with pale yellow cup; very large flower. Each 8c., doz. 75c., 100 \$4.00.

NARCISSUS PAPER WHITE GRANDIFLORA

Lilies for Forcing

LILIUM HARRISII

Lilium Harrisii. Bermuda Easter Lily

This Lily is at present the **favorite** variety with both the proficient and the amateur. Flowering at Easter makes its long white tubular flowers of extreme fragrance all the more welcome. For table or church decoration, no plant is more useful, and it remains after cutting in perfect condition for a long time. Without doubt, the Bermuda Easter Lily is now the most **popular** white flowering plant.

Extra Size Bulbs. 7 to 9 inches. Each 20c., doz. \$2.00, 100 \$14.00.

Mammoth Size Bulbs. 9 to 11 inches. Each 30c., doz. \$3.25, 100 \$25.00.

Lilium Longiflorum Multiflorum

The well-known, lovely pure snow white, hardy Garden Lily, bearing a profusion of trumpet-shaped flowers, 6 to 8 inches long. This variety is also valuable for the greenhouse, being a **good forcer**. Grows to the height of three to four feet on stiff, straight stems, well foliaged. If planted in open ground, will flower in June. Quite hardy.

Japan Grown. (Ready about September 20.)

Extra Size Bulbs. 7 to 9 inches. Each 10c., doz. \$1.00, 100 \$7.00.

Mammoth Size Bulbs. 9 to 10 inches. Each 15c., doz. \$1.75, 100 \$12.00.

Monster Bulbs. 10 to 11 inches. Each 30c., doz. \$3.00, 100 \$20.00.

Lilium Longiflorum Formosum

This new type of Easter Lily comes from the Island of Formosa. It is easy to grow and free from disease.

First Size Bulbs. 7 to 9 inches. Each 15c., doz. \$1.50, 100 \$10.00.

Mammoth Bulbs. 9 to 10 inches. Each 20c., doz. \$2.00, 100 \$15.00.

Monster Bulbs. 10 to 11 inches. Each 35c., doz. \$3.50, 100 \$25.00.

Lilium Longiflorum Giganteum

Dark-stemmed variety, flowers somewhat later than Multiflorum and larger.

7-9 inches. Each 15c., doz. \$1.50, 100 \$10.00.

9-10 inches. Each 20c., doz. \$2.00, 100 \$16.00.

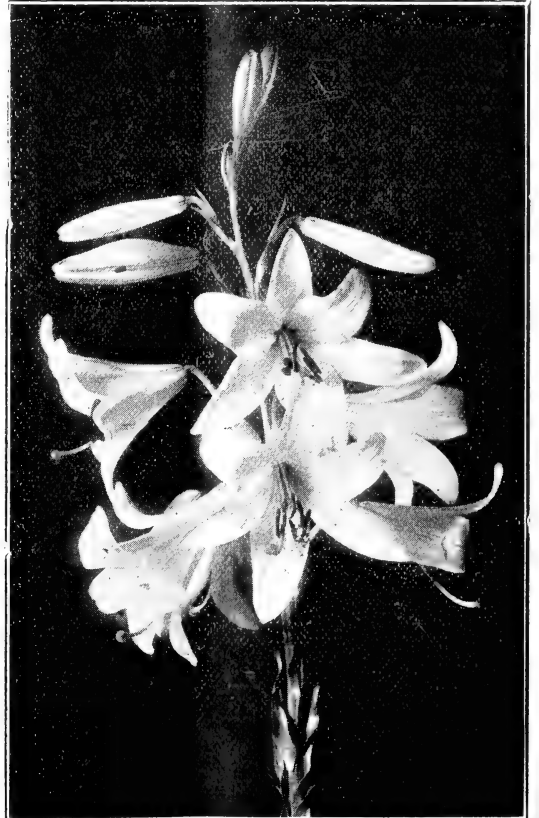

10-11 inches. Each 35c., doz. \$3.50, 100 \$24.00.

Lilium Candidum

Annunciation, Madonna or St. Joseph Lily

The well-known Garden Lily; snow white, fragrant blossoms; grows from 3 to 4 feet high. Blooms in June in the open ground; is also a good forcer for greenhouse work. A shady nook in the garden is made exceedingly bright by its presence. Quite hardy, needing no protection from frost.

Extra Large Bulbs. Each 15c., doz. \$1.50, 100 \$9.00.

LILIUM CANDIDUM

Hardy Lilies FOR OUTSIDE PLANTING

Lilies are matchless among hardy plants for beauty of form and variety of color in the garden. They commence flowering in May, and with the various species maintain a continuous and unbroken succession of bloom until Autumn. No class of plants, capable of being cultivated out-of-doors, possesses so many charms; their stately habit, rich and varied colored flowers, often deliciously fragrant, and easy culture, render them so distinct from all other hardy plants that no collection, however select, should be without a few of the choicer sorts.

AURATUM (The Golden Lily of Japan). Delicate, white, thickly studded with crimson spots, and through the center of each petal is a bright gold band; large and fragrant.

W. & D.'S EXTRA SELECTED BERLIN FORCING LILY OF THE VALLEY

W. & D.'s Selected Lily of the Valley Pips

(Ready for Delivery
in November)

The Lily of the Valley is one of the most useful and greatly admired plants grown; the modest bell-shaped flowers of purest white are highly prized for cutting purposes, and for flowering in pots in the Winter they are exceedingly well adapted and will last several weeks in beauty. By taking them in at intervals a succession of flowers may be kept up all Winter. For forcing the pips should always be used, being especially selected for that purpose; they are all extra heavy, 3-year-old crowns and every one can be relied upon to produce at least one, and very often two, well-developed flowers. Plant in flats or pots (about twelve pips in a 6-in. pot) with all the fibrous roots carefully preserved, and keep the crowns above the soil. Place them in a temperature of about 80 degrees, cover the crowns with loose moss, and keep them constantly moist. They should flower in about five weeks.

W. & D.'s Extra Selected Strong Berlin Pips for Early Forcing.

This grade of Lily of the Valley we recommend as the very best. The pips are large and plump with plenty of fibrous roots, giving extra strong spikes of bloom with from 12 to 15 large, well-developed bells and strong healthy foliage. This grade has given excellent satisfaction wherever grown.

Doz. 40c., 100 \$2.50, 1000 \$20.00.

Selected Dresden Pips.

Like the preceding, this grade is also very carefully selected, pips are heavy and plump, but being grown in a somewhat heavier soil they do not force quite as quickly as the Berlin pips; they are more adapted for second early forcing; excellent quality. Doz. 35c., 100 \$2.25, 1000 \$18.00.

Cold Storage Lily of the Valley Pips

(Can be supplied at any time of the year)

We wish to call your attention to our special brand of "W. & D.'s Extra Selected Berlin Forcing Lily of the Valley Pips." They have given great satisfaction in past seasons. They can be had in bloom in 21 days from planting.

Lily of the Valley Clumps

(Ready about 1st
of November)

Are generally used for outdoor planting, and should be placed in a shaded locality, where they can be left permanently. They are the most popular of Spring-flowering plants, and are greatly admired on account of their graceful appearance and delicate bell-shaped, pure white flowers; highly prized for cutting in the early Spring. They are the most charming when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy.

Selected Clumps. Each 25c., doz. \$2.50, 100 \$18.00.

Freesia

This is one of the most beautiful of all Cape bulbs, possessing a peculiar grace of form, and its fragrance is most delightful, one pot of five or six bulbs being sufficient to perfume a whole house. As cut flowers they are extremely valuable; the unexpanded blooms, opening in water, fill the air with the most delicate perfume, and their endurance is really remarkable. They force very easily, and can be had in flower at Christmas, and continue in succession until June. When potted these should not be placed in a dark place like most other bulbs, but should be put directly in the light.

Purity. A grand variety bearing large clusters of magnificent pure white flowers on extra long stiff stems, one truss bearing from 8 to 10 delightfully fragrant blooms.

Mammoth Bulbs. (Very scarce.) Doz. 75c., 100 \$4.50.

Extra Large Bulbs. Doz. 50c., 100 \$3.50, 1000. \$30.00.

FREESIA REFRACTA ALBA

Spiraea, or Astilbe

(Ready in November)

Tall, graceful, branching, herbaceous perennials, extensively used for forcing, either as cut flowers or in pots. Well-grown plants bear 25 to 40 large

SPIRAEA GLADSTONE

plume-like trusses of pure white flowers, enveloping the plant with a feathery foam. Undoubtedly one of the most beautiful and graceful subjects grown for Winter and Spring decoration in the house and conservatory, and highly prized as an Easter plant. They should be potted as soon as received and buried outside until they begin to form roots. They may then be taken in as required. They require an abundance of water.

Japonica. A perfectly hardy plant, with feathery white flowers; largely grown for forcing in pots and splendid for cutting. Each 15c., doz. \$1.50, 100 \$7.00.

Nana Compacta Multiflora. Very dwarf and compact; bright green foliage, with pure white feathery flowers, excellent for forcing. Each 15c., doz. \$1.50, 100 \$9.00.

Astilboides Floribunda. An improvement on the common astilboides; large, pure white plumes, bright foliage. Each 15c., doz. \$1.50, 100 \$9.00.

Gladstone. A large flowering, pure white variety, borne on erect stalks, showing well above the foliage, good forcer, strong clumps. Each 25c., doz. \$2.50, 100 \$16.00.

Peach Blossom. New Pink, excellent for pot culture. Each 30c., doz. \$3.00, 100 \$20.00.

Superba. Pure white, large flowering, strong clumps. Each 15c., doz. \$1.50, 100 \$10.00.

Washington. Pure white, 1½ to 2 ft. high; sturdy habit, strong clumps. Each 25c., doz. \$2.50, 100 \$16.00.

Queen Alexandra. Pink. A new pink variety, resembling Gladstone in habit; a free bloomer, and bears its flowers well above the dark green foliage. When forced it should be shaded as soon as it starts to show color. Each 35c., doz. \$3.50, 100 \$22.00.

Spanish Iris

The Spanish Irises flower two weeks before the English and differ from them considerably, the colors of the flowers being showier and more varied. The curious and charming blendings of shades in the same flower give them the appearance of many of our rare Orchids. For vases and bouquets the cut flowers are greatly prized as they last long when cut, and the buds open well in water. They are quite hardy out of doors, requiring only slight mulching in Winter.

SPANISH IRIS

Calla, or Lily of the Nile

Easily cultivated in pots, requiring only rich soil and plenty of water.

We offer dry bulbs for forcing and Winter flowering purposes. Dry bulbs planted in 4-inch pots will give better results than plants in 6-inch pots that have been kept growing.

WHITE CALLA, or LILY OF THE NILE (Richardia Aethiopica).

Dry bulbs, extra large. Each 25c., doz. \$2.50, 100 \$20.00.

Dry bulbs, 1st size. Each 15c., doz. \$1.75, 100 \$12.00.

SPOTTED LEAF CALLA (Richardia Alba Maculata). Each 10c., doz. 75c.

DWARF CALLA "Little Gem" (Richardia Nana). Each 10c., doz. \$1.00.

ELLIOTTIANA. Finest yellow Calla, blooms 4 to 5 ins. across at mouth, of deep golden color. Leaves spotted white. Each 30c., doz. \$3.00.

BLACK CALLA (Arum Sanctum). Each 20c., doz. \$2.00.

Eucharis Amazonica

If there is a purer, sweeter, or more exquisitely beautiful flower than this we never have had the good-fortune to see it. It is a bulbous plant, throwing up tall spikes on which are borne several very large, star-shaped flowers of the purest waxy whiteness and unexcelled fragrance. Largely used for forcing. Each 60c., doz. \$6.00.

Miscellaneous Bulbs

Amaryllis

Aulica (Lily of the Palace). Crimson, shaded with green. Each 50c.

Equestris. Light, rich scarlet, marked with white bars in the center of the throat. Each 15c., doz. \$1.50.

Johnsonii. Crimson striped with white. Each 60c.

Formosissima (Jacobean Lily). Scarlet. Each 15c.

Zephyranthes Candida (West Wind Flower). Fine for pot culture. Large, pure white flower. 3 for 10c., doz. 30c., 100 \$2.00.

THE DON TOMATO

Tomato

The Don—Extra Early Forcing

The fruit is of medium size, dark red in color, very smooth, solid, and almost globe shaped. The plants form 3 to 6 stalks, and average 6 feet in height with comparatively very little foliage.

It is remarkable for its bearing qualities; the plants are covered with clusters of fruit averaging from 5 to 9 tomatoes in each cluster, bearing right down to the bottom of the stems. It is also very valuable for first crop outside planting.

Central Park Lawn Grass Seed

(Weight: 20 pounds per bushel)

This lawn mixture is composed entirely of the finest quality of fine-leaved dwarf (evergreen) growing grasses, in such proportions as will enable it to withstand the extreme heat of our Summer. We give special attention to the RE-CLEANING of our grass seeds, removing all obnoxious weeds and foreign substances, thus insuring a perfect and clean lawn.

We recommend **four bushels of seed to the acre**; the thicker the seed is sown the sooner a smooth, velvety lawn will be obtained. One quart of seed will sow 15x20 feet (300 sq. ft.); 1 bushel, 100x108 feet (10,800 sq. ft.); 4 bushels, one acre (43,560 sq. ft.)

Price, per quart, 25 cts.; per pk., \$1.50; per bushel (20 lbs.), \$5.00

SURE CROP MUSHROOM SPAWN

A FEW DIRECTIONS FOR FORMING MUSHROOM BEDS

THE Mushroom is one of the most profitable crops grown, especially in the vicinity of large cities, where the demand, at all seasons, is far in excess of the supply. The best time for making Mushroom beds is in August and September, as in the Fall months the natural heat is sufficient to cause the spawn to germinate freely, and the beds made then ought to bear well before and up to Christmas. Mushrooms can be grown in sheds, cellars, caves, under benches in greenhouses, and in regular Mushroom houses.

In preparing the materials, collect sufficient fresh horse droppings to form the desired size of bed, spreading them out in an airy shed to dry, and turning them frequently. When in a proper state as to dryness, which will soon be learned by experience, make these into a bed from nine inches to one foot thick, beating them firmly together. If the droppings have been properly prepared, gentle fermentation will soon commence, and when the temperature of the bed is from 75° to 80°, with no danger of its rising higher, put in the spawn. This is done by making shallow holes, about nine inches apart, inserting pieces of spawn about the size of a hen's egg, and covering with the dung, pressing this closely about the spawn. It is of the greatest importance that the temperature of the bed should not decline below 75°, nor rise above 80°, for a month after spawning. Within a fortnight after putting in the spawn cover the bed about two inches thick with good mellow, moist soil, making this firm, and if under this a covering one or two inches thick of cow dung in about the same condition in moisture as the soil, can be afforded, this will cause the bed to last longer, and also to produce a larger crop than if covered with soil only. The most suitable temperature for beds in bearing is 50° to 55°, and as a high temperature causes the Mushrooms to come small, this should be avoided. Watering beds in bearing often causes the small Mushrooms to damp off; therefore water only when the bed ceases to be productive, and then use the water about the same temperature as the bed.
